I'm not aware of any clean-up values database. That was actually an early pet project of Don Williams. We began trying to create one long ago, but the variables for database entry proved to be complicated at the time. This issue is also where the Carlism, "sausages of uncertainty" came from.

Phil

Gary,

I don't believe there is any type of database for ROD cleanup values. There is a ROD database (<http://www.epa.gov/superfund/sites/rods/>) that has all of the RODs signed, and you can search for keywords, but that would take a while to sort through. Maybe Jon or Phil know a better way???

---

John:

I need to see if you can help me out. I am looking for Remedial Actions Levels for Industrial Sites for soils that have been established in ROD's for the following contaminants. Where can I find these out?

9522473

Arsenic  
Lead  
Benzo(a)Anthracene  
Benzo(a)Pyrene  
2-Methylnapthalene  
Napthalene

Thanks
